TIPS TO MAKE LANGUAGE LEARNING EASIER

1 SING ALONG!

Listen to music in your target language and read the lyrics translation, and then listen again without the translation and try to understand the music!

2 GO ABROAD!

If you have the opportunity to travel to a country where your target language is spoken, do it! Even better, do a work placement or study there. You will be able to practise the language in context.

3 MOVIE TIME!

Watch films in your target language. Turn on the subtitles and read and listen at the same time. This is a great way to make language learning fun!

4 LISTEN UP!

Listen to podcasts in your target language in your everyday life, for example while you working, doing chores, on the bus, exercising, etc.

5 CHAT WITH FRIENDS!

Make friends who speak or who are learning your target language to practise speaking with. Studying and working abroad is the best way to do this!
